

Screen printed Sheet Biomedical Electrode

ISO13485 certified

» SUMMARY

Biomedical electrode signal measurement provided in a disposable product. Noble's unique multilayer printing technology provides detection of stable signals, along with a shielding layer and a newly developed foam layer for excellent touch feeling. Enhanced feeling.

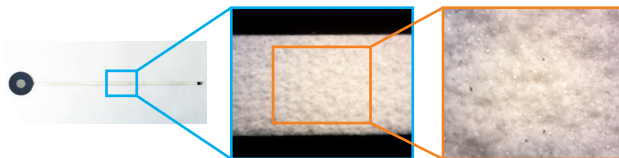

Bioelectrode sample

» FEATURES

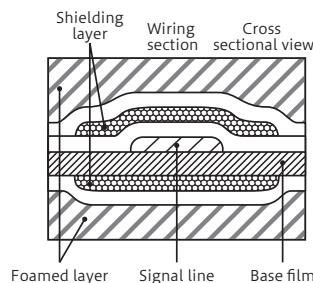

1 Foamed layer

- ▶ Minimized contact discomfort through a spongy printed surface. (No protruding adhesive and no sticky feeling)

2 Noise tolerance

- ▶ Multilayer printing provides a shielding layer that enables stable signal detection.

3 Wide range of sizes available

- ▶ Possible to provide a variety of sizes as needed for infants, children and adults etc.

» PRODUCT APPLICATIONS

- EMG
- ECG
- EEG
