Current Detection Cement-Filled Fixed Resistors

Cement-Filled Fixed Resistors

Metal Oxide Film Fixed Resistors

Fusing Resistors

RGB series

**Incombustible, insulated metal plate resistor.
Will not start a fire when overloaded.
Suitable for current detection due to low resistance.
Used in speaker attenuator circuits.**

RGC series

**Incombustible, insulated metal plate resistor.
Will not start a fire when overloaded.
Low inductance for high sound quality)
Used in amplifier output circuits for emitter
resistance**

RGG, RGD series Incombustible, insulated metal plate resistor
and wire-wound resistor.

**Will not start a fire when overloaded.
Used in inrush protection resistors in high
wattage amplifiers.
RGD has a built-in thermal fuse that melts
in the event of an abnormality.**
